Remarks/Arguments

The present amendment is made in response to the Office Action dated October 20, 2004, and identified as Paper No. 20041018. Claims 1-15 remain pending in the Application.

In the Action, the Examiner rejected claims 1-6 under 35 U.S.C. § 102 (b) as anticipated by U.S. Patent 6,332,782 to Bezama, et al. ("*Bezama*"). Claim 7-15 were allowed.

Claim 1 has been amended to incorporate the limitation that a "power layer" be incorporated into the redistribution package for distributing power the integrated circuit chip. *Bezama* does not teach or suggest inclusion of a power layer in the redistribution package, and its inclusion in claim 1 thus provides a patentable distinction. Instead, *Bezama* teaches the redistribution package that receives its power from an external source.

Claims 2-6 remain in their original form and are believed to be allowed based upon their dependence from claim 1 which, as amended, is also believed to be in condition for allowance. Allowed claims 7-17 remain in their original form as well.

In view of the foregoing amendments, the Examiner's consideration is requested and allowance of the present application is believed to be in order. If the Examiner believes a phone conference with Applicant's attorney would expedite prosecution of this application, please contact the undersigned at (315) 218-8515.

Respectfully submitted,

Dated: January 19, 2005
